Once again an eventful year is coming to a close:

We launched Delfire, the innovative motors for ambients up to 100°C

revamped our cast-iron motors 160M and 160L

implemented new functions in our configurator

step-by-step, we replaced the bodies and the shields of aluminum motors

we introduced very thick fan covers to motors size 63-90 which are impact resistant, soundproofing, scratchproof and rustproof

The turn of the year is a very exciting time: let the previous season pass in review and look ahead to the future with curiosity on the next successes:

Motors size 180-280 will become maintenance free

The VFD NEO-WiFi will be customized for compressors, ventilation, and high pressure pumps and hydraulic power packs pressure control

A new single-three phase VFD called NANO will surprise you

ENDURO helical bevel gearbox will be put on sale in about 4 months

STON shaft mounted gearbox will be put on sale a little before STON

The improvements in alu motors will go on to complete all sizes

We will participate to more and more International exhibitions. We've already reserved HannoverMesse, WIN Automation 2017 Istanbul and Wetex Dubai

We would like to use this time as an opportunity to send you season's greetings and wish you a new motive-ating year!

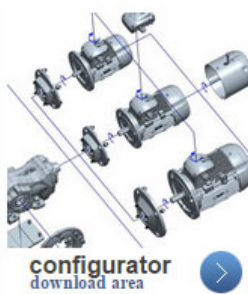

Motive will be closed from Dec 24th 2016 to Jan 8th 2017 for Christmas Holidays.
