Ready and free the new PC interface SW of NEO-WiFi

*You can use it to make the settings, to command, and to check the alarms history from your PC*

NEO-WiFi is a patented Variable Frequency Drive where the settings, the command and the alarms check can be done by a remote radio keypad without any wire

Motive has further enhanced it to allow this to be done via Personal Computer, thus having a more user friendly interface

You find the link for its download inside NEO-WiFi manual. Connect a NEO-WiFi to your PC and try it.

To download the manual, the SW and get more details:http://www.motive.it/manuali/manuale-NEO-WiFi-eng.pdf

Motive will not stop here. It's already preparing also a Bluetooth connection for smartphones and tablets
